# Atlantic Area Tour 2015

Renewable Energy & Public Transport  
June 9<sup>th</sup> - June 19<sup>th</sup>

The Atlantic Area Tour is an innovative conference tour journeying through five countries on Europe's Atlantic coast. The Conferences will each promote a different aspect of the topic "renewable energy and public transport" and will host a vast array of experts in the field, policy makers and advocates for sustainable mobility.

## Bus Stop Details

# Atlantic Area Tour 2015

Renewable Energy & Public Transport

June 9<sup>th</sup> - June 19<sup>th</sup>

## TOUR STOPS

### STOP 1

#### Glasgow, Scotland, 9th June

---

The kick off event of the Atlantic Area Tour. Partners of the REPUTE project will present the key innovations of the project, such as the REPUTE guide. There will be a special focus on the Scottish pilot projects integrating renewable energy and public transport.

### STOP 2

#### Newry, Northern Ireland, 11th June

---

Skytran CEO Jerry Sanders joins us to present a futuristic mass mobility project in Tel Aviv. Rajnish Ahuja will update us on the state of the art in India. Wrightbus' Robert Brayshaw will give us an insight into the exciting world of hybrid buses, while Ciarán de Búrca from the Department of Regional Development will present Belfast Rapid Transit and Belfast on the Move.

### STOP 3

#### La Rochelle, France, 15th June

---

This one day conference will provide insight to existing and future trends in sustainable mobility. It will blend research and ideas with actions. 18 presenters from home and abroad will discuss innovations in biogas, electricity, algae fuel, hydrogen power-togas & magnetic levitation will all be discussed.

### STOP 4

#### Oviedo, Spain, 17th June

---

At Oviedo the agenda will focus on fast developing Information and Communication Technology applications to assist with mobility. ICT has a major role to play in the future of sustainable transport and this conference is the place to learn all about it!

### STOP 5

#### Torres Vedras, Portugal, 19th June

---

A super exciting pilot project that combines public transport with electric cars in a really innovative way will be the focus of this stop. The potential for electric vehicle sharing schemes has been one of the key ideas explored by the REPUTE project and the results will be a highlight of this conference. If you want to see the future of mobility come to this event!

# REPUTE

Renewable Energy in PUBLIC Transport Enterprise

## The Atlantic Area Tour will serve as a vibrant conclusion to the REPUTE project partnership.

Throughout this 18 month Interreg Project lots of work was done by the partnership. The Conference Tour will bring all of this together and present it to a wide audience across the Atlantic Area.

- We published a guide highlighting best practice innovation in renewable energy & public transport across the Atlantic Area
- We held workshops in each region to facilitate knowledge transfer and networking between stakeholders
- We have run pilot projects in two regions including an innovative electric car share scheme
- We have shared information challenges and experiences in relation to public transport, behaviour change, renewable energy and ICT.

The project partners will be on hand at each event to network, to talk about their work and to present their experiences of working together to help foster greater knowledge, awareness, focus and innovation in the development of renewable energy in public transport in their regions.
